

A SOLUTION FOR EVERY NEED

A wide variety for promotional activities

To deliver additional product or promotional information directly at the point of sale, info holders play a key role. The Info holders can be stand alone models, mounted together or mounted on shelves, datastrips or wire baskets. They are manufactured in a variety of materials to suit specific needs.

Customised messages

Our in-house pad printing and silk-screening facilities can deliver the products with customised messages. Foldable flat-pack versions are the efficient way to keep transport costs down to a minimum. The solid injection moulded series are ideally suited for permanent and semi-permanent displays and are also available as multi-tier models. The heat-bent and die-cut models are designed for promotional and seasonal campaigns.
